

Rushil Gangisetty

SOFTWARE ENGINEER | DALLAS, TEXAS

gangisettyrushil@gmail.com | github.com/gangisettyrushil10 | linkedin.com/in/rushilgangisetty10 | Portfolio

PROFILE

Product-minded software engineer building end-to-end products across web, desktop, native macOS, and backend systems. Shipped Buzzr to TestFlight; currently building Fuzzy, a local-first AI study IDE, and PixelDraw, a macOS-first OpenAI creative tool.

EXPERIENCE

Seam.ai | *Software Engineering Intern*

Aug 2024 - May 2025

- Built full-stack SaaS features in Next.js with Clerk, Stripe, and Supabase, including protected APIs, organization onboarding, and a Clerk-to-Supabase JWT provisioning bridge.
- Engineered Python data pipelines using crawl4ai and Llama 3.1 70B with JSON-schema enforcement and a two-stage repair path for malformed model output.
- Built a Chrome Manifest V3 extension with service workers, webRequest, and Set-based deduplication across batched API responses.

Aeyesafe | *Software Engineer Intern*

Jun 2025 - Aug 2025

- Tested end-to-end IoT data flow across thermal, radar, and sleep sensors, API ingestion, and storage.
- Documented connectivity, delayed-packet, and synchronization failures; produced debugging runbooks for engineering triage.

Austin College | *Teaching Assistant, Introductory Programming*

Aug 2024 - Dec 2024

- Designed and administered the final lab project and supported students through office hours and one-on-one code debugging.

SELECTED PROJECTS

Fuzzy | *Electron, React, TypeScript, SQLite, OpenAI*

2026

- Built a Mac-first study IDE for PDFs with selection-grounded OpenAI tutoring, anchored notes, reading plans, study packs, and durable local SQLite state.
- Added a cross-source highlight library with Daily Review, spaced repetition, search, tagging, and Notion/Obsidian export while preserving existing reader and AI flows.

Buzzr | *React Native, Expo, Supabase, PostgreSQL*

Oct 2025 - Present

- Shipped a sports social app to Apple TestFlight with 18 beta testers and 7 live league integrations.
- Built real-time watch parties, ratings, social feeds, and mobile/web product surfaces on Supabase, Edge Functions, and live subscriptions.

PixelDraw | *SwiftUI, Metal, SwiftData, Supabase, OpenAI*

2026

- Building a native macOS 14+ pixel-by-number app with Metal rendering, offline guest-mode coloring, and saved local progress.
- Moved six server-side generation workflows to OpenAI Responses, Moderation, and Image APIs for photo, mood, song, daily ritual, palette, and summary flows.

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, Python, Swift, C#, Java, SQL

Product: React, Next.js, React Native, Electron, SwiftUI, Metal, Tailwind CSS

Backend/Data: Supabase, PostgreSQL, SQLite, ASP.NET Core, FastAPI, REST APIs

AI/Delivery: OpenAI API, LLM workflows, Docker, Git, CI/CD, Vitest, xUnit

EDUCATION

University of Texas at Dallas | *Incoming M.S. in Computer Science*

Aug 2026 - May 2028

Austin College | *B.S. in Computer Science and Mathematics | GPA: 3.5/4.0*

May 2025

Leadership: President, Computer Science & Robotics Club | Certification: Microsoft Azure Fundamentals
