Education

University of Texas at Dallas

M.S. in Computer Science

Aug 2026 – May 2028

GPA: 4.0/4.0

Austin College

B.S. in Computer Science and Mathematics

Aug 2021 – May 2025

GPA: 3.5/4.0

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Databases, Machine Learning, Artificial Intelligence

Certifications: Microsoft Certified: Azure Fundamentals, Full Stack Engineer

Leadership: President, Computer Science Club | President, Robotics Club

Technical Skills

Languages: Java, C#, Python, JavaScript, TypeScript, SQL, Bash

Frameworks: ASP.NET Core, EF Core, React, React Native, Expo, Node.js, Next.js, Flask, FastAPI, Spring Boot

Developer Tools: Git, Docker, Jenkins, Maven, Postman, Linux, Visual Studio, VS Code, Figma

Databases: PostgreSQL, MySQL, MariaDB, SQL Server, Supabase

Product Skills: Agile/Scrum, REST APIs, MVC Architecture, Unit Testing, CI/CD, ETL Pipelines, Data Validation

Experience & Leadership

Seam.ai

Aug 2024 – May 2025

Software Engineering Intern

Remote

- Architected an email ingestion pipeline for Valid8 processing **50K+ records/day**, powering relationship scoring and outreach insights across multi-tenant SaaS.
- Developed lead generation features surfacing dormant contacts, recovering **30+** lost opportunities per client and contributing to **\$75K+** in re-engaged pipeline value.
- Shipped analytics dashboards tracking engagement and relationship strength, used by GTM teams to prioritize **200+** accounts and cut manual prospecting by **35%**.
- Engineered NLP-driven backend workflows for classifying and validating email data, achieving **94%** accuracy across **3** subscription tiers.

Aeyesafe

Jun 2025 – Aug 2025

QA Engineering Intern

Remote

- Designed automated test suites validating ETL pipelines converting **10K+** daily IoT sensor streams from AI-powered senior safety devices into structured datasets.
- Wrote data-quality checks catching missing fields, timestamp anomalies, and out-of-range values, improving release confidence by **40%**.
- Stress-tested pipeline outputs across **15+** edge cases including network drops, delayed packets, and device disconnects.
- Authored **5+** failure-mode runbooks adopted by the engineering team, cutting average triage time by **25%**.

Austin College

Jan 2025 – May 2025

Software Engineering Intern

Sherman, TX

- Built forecasting software analyzing **1,000+** academic records, used by **100+** faculty stakeholders for enrollment and retention decisions.
- Implemented **50+** unit tests covering edge cases and academic policy scenarios, maintaining forecast accuracy within **1%**.
- Automated data pipeline workflows replacing manual Excel processes, reducing report generation time by **60%**.

Projects

Buzzr | React Native, TypeScript, Supabase, Expo, PostgreSQL

2026

- Designed a full-stack mobile and web sports platform with REST APIs, auth, and relational schema supporting **7** live league integrations.
- Developed dynamic UI with async data fetching and optimized Supabase queries across **20+** endpoints and **15+** relational tables.
- Shipped watch party and social features deployed across **2** platforms (iOS, Web) with CI/CD and production monitoring.

Credit Union Ledger API | ASP.NET Core, C#, PostgreSQL, Docker

2026

- Engineered REST APIs for accounts and transactions using layered architecture with dependency injection and repository pattern.
- Implemented idempotent transactions with balance enforcement, audit logging, and **100%** rollback coverage on constraint violations.
- Wrote **40+** integration tests and Dockerized the deployment with config for dev, staging, and production.

IBM Medscribe AI | React, JavaScript, Flask, Python, IBM watsonx

2025

- Developed an AI-assisted clinical workflow transforming physician notes into structured summaries using IBM watsonx, reducing manual review time by **50%**.
- Constructed a React-based review interface with trust cues and live/mock demo modes, processing **100+** sample clinical documents.
